Seedling Pæonies

ORIGINATED BY

H. A. TERRY
FLORA GARDEN NURSERY

¶ The proprietor of this Nursery has been growing these Seedling Pæonies for the past thirty-four years, and has succeeded in producing some very fine varieties, as the following list will show. These flowers are so very hardy, so intensely beautiful and showy, and so easily grown, that every person should have a collection of them. Pæonies, when dormant, will stand much exposure, and can be shipped long distances without injury. They are never attacked by any insect, animal or disease; nor do the plants require protection during the winter, as they are the most hardy and showy of all the garden flowers. The prices are made so low that everyone can afford to have a good assortment of them. All stock is warranted true to name; they can be planted in fall or spring, but fall is considered best. Price 25c each, except those noted. Those marked with a star will not be for sale until autumn of 1905.
